Description

The ICETE Programme for Academic Leadership (IPAL) was officially established in 2010 and arose out of the need to provide training to theological institutions in different regions of the world. This publication is the first of three volumes intended to accompany and support the IPAL seminars as well as independently providing wider access to the principles required by academic leaders for institutional development.

Each chapter shares and illustrates the contributors' expertise in and understanding of education, leadership and administration in the field of evangelical academic institutions. With an intentional awareness of a wide range of non-Western contexts this volume is a much-needed guide for senior administrators around the world.
